## First Announcement of the 9<sup>th</sup> ICEM

We convene this important international conference six decades since the first report that a chemical can be mutagenic; five decades since the double-helical structure of DNA was revealed; and four decades since the discovery of excision-repair, which removes pre-mutagenic lesions from DNA to prevent mutagenesis.

The broad subject of the 9<sup>th</sup> ICEM transcends national boundaries and is timely for all peoples of the world. In recent years, we have learned a great deal about the threats to human health from genotoxic chemicals and radiations in our environment. We also have learned of many inherited and acquired genetic alterations that predispose individuals to cancer, premature aging, and other diseases. The sequencing of the entire human genome (as well as that of many other organisms), along with the development of powerful new technologies, promises to yield even more impressive advances in the coming decade. It should certainly become possible to identify and reduce most of the principal environmental hazards that threaten our health and that of the planet. These hazards include not only genotoxins but also infectious agents and chemicals that adversely effect important cellular processes.

To highlight these issues and to explore solutions to these global threats to our collective health, the 9<sup>th</sup> ICEM will offer many symposia and plenary lectures

from the world leaders in environmental mutagenesis and related fields. Broadly, speakers will address how environmental contaminants can damage the genome, how such damage may be repaired or else processed into mutations, and how the resulting mutations may lead to disease. Symposia at the cutting-edge of basic and applied research will present details of new technologies in molecular biology and biomedical research as they apply to the global problem of maintaining genomic integrity and human health. There will be opportunities for researchers from all countries to present their most recent research in poster and platform sessions. We will also include relevant workshops and special programs for students, who will be the scientists and leaders of the future.

The venue for the conference will be the Hyatt Regency San Francisco Hotel at the Embarcadero waterfront in the heart of the lovely city of San Francisco, California.

We enthusiastically look forward to welcoming you to the 9<sup>th</sup> ICEM in September 2005.

Philip C. Hanawalt  
President/Chair of the Organizing Committee

### Return to receive future mailings

- Will probably attend
- I plan to present a poster or a platform talk.
- Correspond by E-mail

Name \_\_\_\_\_

Institution/Company \_\_\_\_\_

Address \_\_\_\_\_

Phone \_\_\_\_\_

Please detach and return card to  
EMS Headquarters or send an  
E-mail to: [emshq@aim-hq.com](mailto:emshq@aim-hq.com) or  
Fax to: (703) 438-3113

or visit [www.ICEM2005.org](http://www.ICEM2005.org)

### Organizing Committee

Phil Hanawalt	Chair
David DeMarini	Program Committee Chair
William Au	International Advisory Board Chair
Priscilla Cooper	Local Arrangements Chair
James Gentile	IAEMS President
Lynn Ferguson	IAEMS Secretary General
George Douglas	IAEMS Treasurer
David Eastmond	EMS President
Leona Samson	EMS President-elect
Larry Loeb	EMS Past President
Jeness Majeska	EMS Secretary
Michael Plewa	EMS Treasurer
Tonia Masson	EMS Exec. Director/Conf. Secretariat

EMS Headquarters  
1821 Michael Faraday Drive, Suite 300  
Reston, VA 20190

### Program Committee

David DeMarini	Kathleen Hill	Miriam Poirier
<i>Chair</i>	George Hoffmann	R. Julian Preston
Phil Hanawalt	Nina Holland	Ann Richard
<i>Co-chair</i>	Bernd Kaina	Toby Rossman
Marilyn Aardema	David Kirkland	Collette Rudd
C. Sid Aaron	Catherine Klein	Alain Sarasin
Richard Albertini	Tom Kunkel	Martyn Smith
William Baird	Alan Lehmann	John Tainer
Stefano Bonassi	Susan LeDoux	Liza Snow
Judy Campisi	Mats Ljungman	Peter Stambrook
Rosalie Elespuru	Nancy Maizels	Joann Sweasy
John Essigmann	James MacGregor	James Swenberg
James Felton	Heinrich Malling	John Tainer
Michael Fenech	Carlos Menck	Ray Tice
Sheila Galloway	Harvey Mohrenweiser	Bert van Zeeland
Helena Groot	Alex Morley	Susan Wallace
Andrew Grosovskiy	Minako Nagao	Michael Waters
Makoto Hayashi	Patricia Ostrosky-	Paul White
Hikoya Hayatsu	Wegman	Sam Wilson
		Akira Yasui
