

The New England Consortium (TNEC)

ACTIVITY

A “tool-box talk” is an informal group discussion that focuses on a particular safety issue. It does not take the place of formal training but is designed to provide workers with a general understanding of an issue or topic.

Develop a “tool-box talk” for the following:

- 1) What information is contained in the Green-colored pages of the U.S. Department of Transportation 2008 Emergency Response Guidebook? (Hint: Page 4)
- 2) What is the recommended *evacuation distance* during the daytime for **arsenic chloride** if many small packages have spilled creating a “large” spill? (Hint: definition of large spill may be found on Page 360 of the 2008 ERG).
- 3) What is the recommended *evacuation distance* during the nighttime for **arsenic chloride** if many small packages have spilled creating a “large” spill?
- 4) What is the *isolation distance* for a spill involving arsenic chloride?

ACTIVITY

A “tool-box talk” is an informal group discussion that focuses on a particular safety issue. It does not take the place of formal training but is designed to provide workers with a general understanding of an issue or topic.

Develop a “tool-box talk” for the following:

- 1) If the routine protocol for using the 2008 U.S. Department of Transportation Emergency Response Guidebook cannot be completed and the placard on a vehicle is visible, what steps should be followed? (Hint: Page 1 of ERG)
