- Dillard University
 - New Orleans, LA; [Pensacola, FL](#); Houston, TX; and Detroit, MI.
- United Steelworkers
 - [New York City, NJ](#)

Strategies to Improve Programs

- Adding in Economic Impact and other metrics to evaluation of the training programs\
- Increasing outreach to other vulnerable communities – Women, Native Americans, etc.
- Other resources – HMTRI Brownfields Toolbox -<http://brownfields-toolbox.org/>
- Sharing success of programs through articles, journals, media and other sources
 - **Safety training for community members involved in cleanup** By Kevin Riley
 - <http://www.niehs.nih.gov/news/newsletter/2016/9/community-impact/training/index.htm>

Students in UCLA-LOSH's HAZWOPER course practiced decontamination after responding to a mock hazmat incident. (Photo courtesy of Phil Barajas)

Sharing expertise

UCLA-LOSH advised the state agency on certification requirements for workers who handle lead and on best practices for providing workforce development to residents of underserved communities.

Other collaborators included the Los Angeles Trade Technical College, NATEC International, Inc., and Thermo Fisher Scientific.

Residents of communities affected by Exide were trained to conduct soil sampling and lead assessment. Some have already been hired.
