

PATIENT/PARENT GLOBAL DAMAGE ASSESSMENTS

Subject's IMACS number _____
Date of assessment (mm/dd/yyyy) _____
Assessment number _____
Assessor _____
Assessor's relationship to subject: Patient___; Mother:___; Father___; Other (specify):_____

Another process affecting health is disease damage, which is the effect on your body from previous disease damage and treatments for the myositis. Disease damage lasts at least six months (and sometimes forever) and is difficult (and sometimes impossible) to improve. Some examples of myositis damage include things like muscle scarring or thinning (atrophy) and scarring of previously active skin rashes.

1. Considering all the ways that myositis affects you/your child, please rate the overall amount of damage of you/your child's myositis has caused to your body by placing a mark on the line below.

No damage

Maximal damage

2. The Patient Global Disease Damage Assessment may also be completed on a scale that ranges from 0-10 in increments of 0.5, which measures a patient's overall evaluation of their disease damage. "0" indicates no evidence of disease damage and "10" indicates maximal disease damage.

Considering all the signs and symptoms of the disease AT THE TIME OF THE PRESENT VISIT, please rate the overall level of disease damage by filling a circle below.

No damage	0	0.5	1	1.5	2	2.5	3	3.5	4	4.5	5	5.5	6	6.5	7	7.5	8	8.5	9	9.5	10	Maximal damage
