EHP Bisphenol A Special Collection

A lot can happen in five years, especially in the field of environmental health science. Bisphenol A (BPA) research is a prime example of how quickly a body of knowledge can grow and evolve. *Environmental Health Perspectives* (EHP) is now pleased to present its Bisphenol A Special Collection, a comprehensive collection of peer-reviewed research on BPA published in *EHP* over the past five years.*

What's inside? The *EHP* Bisphenol A Special Collection is offered as a fully searchable pdf file. You'll find brief summaries of dozens of BPA-related commentaries, reviews, and research articles across a breadth of fields:

- Toxicology
- Human Exposure
- Epidemiology
- Regulatory Science

Each title is hyperlinked to the full article on the *EHP* website (ehponline.org) along with links to relevant news features, editorials, and podcasts.

What are the *EHP* Special Collections? Each month *EHP* publishes peer-reviewed commentaries, research, and reviews from a wide range of scientific disciplines encompassing mechanistic research, experimental and observational human studies, and *in vitro* and *in vivo* animal research. *EHP* Special Collections are a way for us to streamline delivery of content on topics of special interest to our readers. Each October we publish a Children's Health Collection compiling all children's health-related content published in *EHP* over the prior year.

*Articles were published in the print edition of *EHP* between January 2007 and December 2011.
