

July 20, 1:00 – 4:00 p.m. EDT

What is an Ontology?

Overview of different knowledge organization systems (taxonomies, thesauri, ontologies), where to find ontologies, and how to use them.

Relevant Ontologies for EHS

An overview of key ontologies and terminologies useful for environmental health sciences research.

Hands-On: Applying an Ontology in Practice

Participants will be guided through an example of how to find and apply an ontology as well as what to do when a term is not found.

Participant Discussion

Q&A based on participants' hands-on experience.
