

# NIH Climate Change and Health Strategic Framework focus

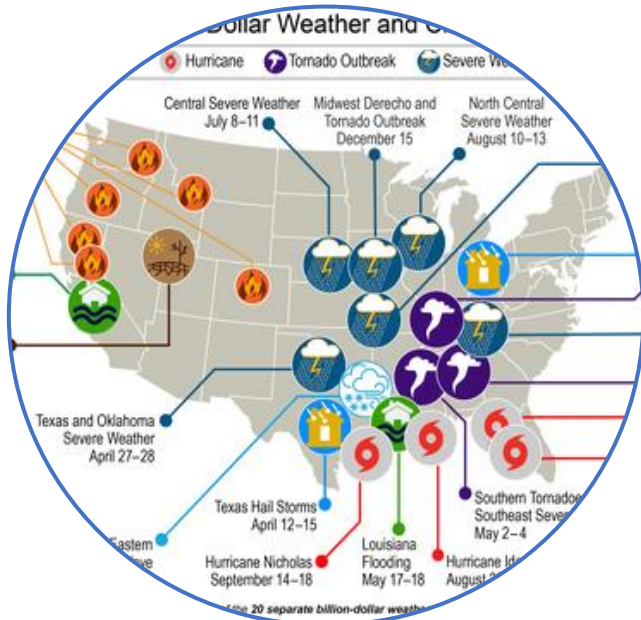

- ***Solutions oriented***
- ***Community engaged***
- ***Transdisciplinary***
- ***Research and capacity building***
- ***Underserved and at-risk populations***
- ***In the US and in LMICs***

<https://www.nih.gov/climateandhealth>

# Addressing Climate Change & Disasters via Health Research & Implementation Science

## Context Individual, Family, Community...

- *Is it Safe?*
- *Physical & mental health impacts short & long term?*
- *Actions to take?*

Etiologic & Risk Reduction Research

- Health Impacts?
- Exposures- Is it safe?
- Protective measures?

Risk Factors  
Risk Predictors  
**Interventions/  
Practices**

Evidence to inform delivery of health & safety measures

Implementation Science

- Feasible & appropriate?
- Improved uptake?
- Sustained use?

Population Health Policies & Practices

- Preparedness
- Response
- Recovery
- Resiliency
- Mitigation
- Adaptation
