

Sea Port Activity

Group 1

You are assigned as Ship/Hatch Foremen. During the operation, an employee noticed vapor or steam coming from a container in the hold. Two placards are visible, both black and white in color.

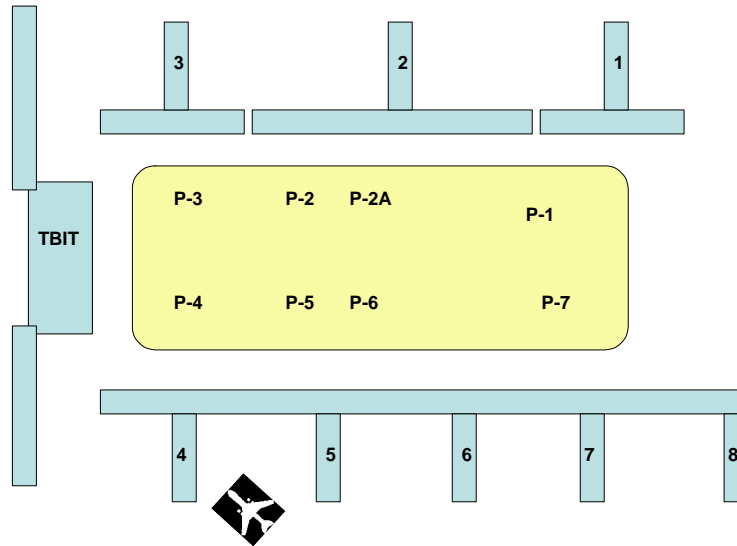

1. What will be your defensive actions?

2. With information from the guide book, which chemical may be causing the release?

Air Port Activity

Group 2

During your normal work on the ground at Terminal 4 you notice a pooled liquid (about 5 gallons) on the ground as an American Airlines air craft backs out of the gate. There is a truck parked to one side with a yellow placard on all sides.

1. What will be your defensive actions?

2. With information from the guide book, which chemical may be causing the release?
