

Workshop Description

3/30/07 10:15 am Workshop Block 4

23. Back to the future: Two ideas for using advanced training technologies in training (*SEIU/ UAB – Mark Catlin & Kenny Oldfield*) *Tracks: Advanced Training Technologies/ Instructor Development*

This presentation/discussion will describe two new ways to use Advanced Training Technology in training. The UAB will describe the creation and use of resources from public domain or other free sources. Such resources include their Informational CD-ROM and durable laminated Emergency Response to Terrorism Job Aid booklets.

Next, the SEIU will demonstrate where and how to download video and ways to modify film clips, using readily available software. A class exercise using video triggers will be demonstrated. The increasing availability of old government and industrial films on the Internet opens up a treasure of possibilities for their use in triggering discussion, especially in refresher classes.
