

## Workshop Description

*3/29/07 1:15 pm Workshop Block 2*

**8. The CAMEO suite: Should I stay or should I go? (Chemical plume mapping software)**

*(ICWUC/UAW – Keith Mundy & Luiz Vasquez) Tracks: Advanced Training Technologies/ Emergency/ Disaster Response and Preparedness*

The ICWUC and UAW will briefly cover free, easily obtainable software that teaches basic principles of Shelter in Place after a large chemical release. This includes CAMEO (a chemical database), ALOHA (a graphic chemical plume software package) and software to place a plume on county maps. We will show how it can be used as a planning tool for industries and communities and the reasons for shelter in place both at workplaces and at home.
