Workshop Description

3/30/07 10:15 am Workshop Block 4

26. **Intro to logic tree diagramming** *(USW –Mike Riley) Track: Training Approaches for Worker Empowerment*

A Logic Tree is a powerful tool for graphically depicting and organizing Incident and Near Miss Investigation information and cause and effect relationships.

The student will learn basic knowledge for creating logic trees that will ultimately lead to determining what safety systems failed in a particular incident or near miss and the critical thinking that goes into the investigation.
