

Workshop Description

3/29/07 1:15 pm Workshop Block 2

11. Identifying and eliminating hazards through procedures (*USW – Bob Olsen*) *Track: Training Approaches for Worker Empowerment*

This course teaches trainees how to use work place procedures to uncover hazards that are hidden right out in the open. It utilizes a real-life case study which walks participants through the process of identifying imbedded hazards. It also provides training in making recommendations to remediate the hazards uncovered with a focus on the hierarchy of prevention with design having the highest value.
