

# In Conclusion...

---

- Establish Dialogue → everyone participates
- Identify conceptualization of health, illness and safety
- Introduce OSH language and concepts to help explain → Connect to the experience
- Use triggers to generate critical thinking and actions

# In Conclusion...

---

- Establish connection from the concrete and personal level to working conditions analysis and action stage
- Address the lack of control through enhancing participation in worker actions
- Identify resources and limitations
- Promote a belief that they can control their work environment and leading to actual systemic changes.

...Empowerment education involves workers in group efforts to identify their own problems, critically analyze roots of the problems, and develop strategies to effect positive changes in their working conditions...
