

WOMEN'S HEALTH AWARENESS: TRANSFORMING COMMUNITIES BY ENHANCING WOMEN'S HEALTH

Chronic Inflammation and Autoimmune Diseases

Autoimmune Diseases & Chronic Inflammation

Autoimmune disease- Autoimmune disease can affect any part of the body, weakening bodily functions and causing healthy cells, tissues, and organs to malfunction and be life-threatening.

Source: <https://www.niehs.nih.gov/health/topics/conditions/autoimmune/index.cfm>

Please see below a list of well-known autoimmune diseases, describing their specific conditions.

Type 1 Diabetes- Diabetes occurs when your blood glucose, also called blood sugar is too high. Blood glucose is your main source of energy and comes mainly from the food you eat.

Source: <https://www.niddk.nih.gov/health-information/diabetes/overview/what-is-diabetes/type-1-diabetes>

Rheumatoid arthritis (RA)- Is an autoimmune and inflammatory disease. RA mainly attacks the joints, and commonly affects joints in the hands, wrists, and knees. This disease means that your immune system attacks healthy cells in your body by mistake, causing inflammation.

Source: <https://www.cdc.gov/arthritis/basics/rheumatoid-arthritis.html>

Inflammatory Bowel Disease- Is a term for two conditions (Crohn's disease and ulcerative colitis) that are characterized by chronic inflammation of the gastrointestinal (GI) tract.
