

CURRICULUM VITAE**Donald N. Cook**

Present Positions: Senior Investigator, Immunity, Inflammation and Disease Laboratory,
 National Institute of Environmental Health Sciences,
 National Institutes of Health.
 111 T.W. Alexander Drive
 Building 101, D240
 Research Triangle Park, NC 27709

Adjunct Assistant Professor,
 Department of Immunology, School of Medicine, Duke University, Durham,
 NC.
 Orcid 0000-0002-0052-3755
 Researcher ID E-5079-201

EDUCATION AND TRAINING

B.Sc., 1983	McGill University, Montreal, Canada	Microbiology & Immunology
Ph.D. 1990	McGill University, Montreal, Canada	Microbiology & Immunology
1990 - 1996	Postdoctoral Fellow, Laboratory of Oliver Smithies.	Department of Pathology, University of North Carolina

PROFESSIONAL EXPERIENCE

2013-present	Senior Investigator, Immunogenetics Group, Immunity, Inflammation and Disease Laboratory (IIDL), NIEHS, NIH, Research Triangle Park, NC.
2009-present	Adjunct Assistant Professor, Department of Immunology, School of Medicine, Duke University, Durham, NC.
2005-2013	Tenure track Investigator, Immunogenetics Group, Laboratory of Respiratory Biology, NIEHS, NIH, Research Triangle Park, NC.
2001-2005	Assistant Professor, Division of Pulmonary and Critical Care Medicine, Department of Medicine, Duke University, Durham, NC.
1998-2001	Principal Scientist, Schering-Plough Research Institute
1996-1998	Associate Principal Scientist, Schering-Plough Research Institute

PUBLICATIONS**A. RESEARCH ARTICLES**

1. **Donald N. Cook**, Nadine Pavloff and John A. Hassell (1990) Simultaneous expression of pp60^{c-src} and polyomavirus middle T antigen in mammalian cells. *Journal of Virology* **64**:2392-2395.
2. **Donald N. Cook** and John A. Hassell (1990) The amino terminus of polyomavirus middle T antigen is required for transformation. *J. Virol.* **64**: 1879-1887.

3. Heather J. Sutherland, D.E. Hogg, **Donald N. Cook**, and Connie J. Eaves (1993) Alternative mechanisms with and without steel factor support primitive human hematopoiesis. *Blood* **81**:1465-1470.
4. **Donald N. Cook**, Melinda A. Beck, Thomas M. Coffman, Suzanne L. Kirby, John H. Sheridan, Ian B. Pragnell and Oliver Smithies. (1995) Requirement of MIP-1 α for an inflammatory response to viral infection. *Science* **269**: 1583-1585.
5. Cathy G. Miller, **Donald N. Cook** and Girish Kotwal. (1996) Two chemotactic factors, C5a and MIP-1 α dramatically alter the mortality from zymosan-induced multiple organ dysfunction syndrome(MODS): C5a contributes to MODS while MIP-1 α has a protective role. *Mol. Immunol.* **33**: (14) 1135-1137.
6. Suzanne L. Kirby, **Donald N. Cook**, William Walton and Oliver Smithies. (1996) Proliferation of multipotent hematopoietic stem cells controlled by a truncated erythropoietin receptor transgene. *Proc. Natl. Acad. Sci. USA*. **93**: 9402-9407.
7. JT Terrence M. Tumpey, Hao Cheng, **Donald N. Cook**, Oliver Smithies, John E. Oakes and Robert N. Lausch. (1998) Absence of macrophage inflammatory protein-1 α prevents the development of blinding Herpes stromal keratitis. *J. Virol.*, **72** (5): 3705-3710.
8. Beatriz E. Brito, Leslie M. O'Rourke, Yuezhen Pan, Jong Moon Park, David Zamora, **Donald N. Cook**, Stephen R Planck, James T Rosenbaum. (1999). Murine endotoxin-induced uveitis, but not immune complex-induced uveitis, is dependent on the IL-8 receptor homolog. *Curr. Eye Res.* **19** (1); 76-85.

SELECTED ORAL PRESENTATIONS

A. National and International Meetings

The amino terminus of polyomavirus middle T antigen is required for transformation. DNA Tumor Virus Conference, August, 1988, Cold Spring Harbor, NY.

Mutational analysis of Polyomavirus Middle T antigen. DNA Tumor Virus Conference, June, 1989, Cambridge, England.

Role of c-kit protein in embryonic development, Keystone Symposium, "Transgenes, Development and Disease". Tamarron, Colorado, January 1991.

Targeting of the gene encoding macrophage inflammatory protein-1 α , Keystone Symposium, "Hematopoiesis", Breckenridge, Colorado, January 1993

Functional analysis of MIP-1 α gene targeted mice (oral presentation). International Conference on Chemokines, June, 1994. Bath, England.

Role of MIP-1 α in pulmonary inflammation during an influenza viral infection: analysis in a MIP-1 α knockout mouse model (oral presentation). International Congress of Immunology, July, 1995, San Francisco, California.

Role of MIP-1 α -expressing cell types in response to viral and bacterial infection. Gordon Conference on Chemokines. June, 1996, Plymouth, New Hampshire.

Analysis of inflammatory responses in MIP-1 α -deficient mice. (invited speaker) 12th Annual New England Immunology Conference. November, 1996, Woods Hole, Massachusetts.

Hematopoietic cell cross-transplantation studies between wild type and MIP-1 α -deficient mice. (invited speaker, oral presentation) NMHCC conference, "Chemokine receptors and host cell interaction". January, 1997, Baltimore, Maryland.

Humoral immune responses in mucosal tissue of CCR6-deficient mice. Keystone Symposium, "Innate and acquired immune responses at mucosal surfaces" (oral presentation). Taos, New Mexico, January, 2000.

CCR6, dendritic cell migration and mucosal immune responses. Gordon Research Conference on chemotactic cytokines, July, 2000 (oral presentation). Meriden, New Hampshire.

The genetics of the LPS response Pathway; studies of BXD recombinant inbred mice. American Thoracic Society Conference, May, 2002, Atlanta, Georgia.

The genetics of innate immunity in the lung (oral presentation). Thomas L. Petty Aspen Lung Conference. June, 2002, Aspen, Colorado.

Innate immune response genes. Keystone Symposium. Molecular and Cellular Basis of Septic Shock, May 2003. Tahoe City, California.

Genetic approaches to studying asthma (invited speaker). Center for Rodent Genetics Annual Meeting, 2005, NIEHS, Research Triangle Park, NC.

The chemokine receptor D6 regulates allergic responses in the mouse. Keystone Symposium. Chemokines. January, 2006. Snowbird, Utah.

Genetics of inflammatory response in the lung (oral presentation). EPA Science Forum. April, 2006, Washington, DC.

The role of TLR4 in human disease (invited speaker), July, 2006. Annual meeting of the Association of Medical Laboratory Immunologists, Washington, DC.

The chemokine receptor CCR6 is required to maintain allergic responses in the lung. International Conference on Dendritic Cells, September, 2006, Edinburgh, Scotland.

Innate immune control of pulmonary dendritic cell trafficking (invited speaker) Transatlantic Airway Conference, January, 2007, Lucerne, Switzerland.

The chemokine receptor D6 has opposing effects on allergic pulmonary inflammation and airway reactivity. American Thoracic Society International Conference, May 2007, San Francisco, CA.

Requirement of CCR2 for Pulmonary Dendritic Cell Migration and Allergen Sensitization Through the Airway (oral presentation). American Thoracic Society International Conference, May 2007, San Francisco, CA.

Allergic Sensitization through the Airway Primes an IL-17-Dependent Immune Response, Including Neutrophil Accumulation and Robust AHR (oral presentation). American Thoracic Society International Conference, May 2008, Toronto, Canada.

Allergic sensitization and tolerance through the airway (invited speaker). Gordon Research Conference on Chemotactic Cytokines, September 21, 2008, Aussois, France.

Role of Dendritic Cells in Pulmonary Inflammation. (invited speaker) mini-symposium, *Current Concepts in Allergic and Inflammatory Dendritic Cell Activation*. American Thoracic Society International Conference, May 2009, San Diego, CA.

Trafficking and function of pulmonary dendritic cells. (invited speaker). Gordon Conference on Chemotactic cytokines, May, 2010, II Ciocco, Italy.

LPS promotes IL-35-dependent suppression of allergen-induced airway disease. Keystone Symposia Immunity in the Respiratory Tract: Challenges of the Lung Environment (oral presentation). Feb, 2011, Vancouver, Canada.

ICOS-B7h interactions reversibly suppress allergen-induced IL-17 secretion and airway hyperresponsiveness. (oral presentation) American Thoracic Society International Conference. May, 2011, Denver, CO.

Migratory properties of pulmonary dendritic cells are developmentally programmed. (oral presentation) American Association of Immunologists Annual (AAI) Meeting. May, 2012, Boston, MA.

Immune Responses to Inhaled Allergens are Modulated by Interactions of Microbial Products with Different Cell Types in the Lung (invited speaker). American Thoracic Society International Conference. May, 2014, San Diego, CA.

Finding the molecular links between house dust and asthma (invited speaker). American Association of Immunologists (AAI) Annual Meeting. May, 2014, Pittsburgh, PA.

Modulation of adaptive immune responses by microbial products (invited speaker). Indoor Environment and Childhood Asthma Workshop, June, 2014, Bethesda, MD.

Regulation of allergic airway inflammation through CD4 T cell plasticity. (invited speaker) American Academy of Allergy, Asthma and Immunology (AAI) Annual Meeting. February, 2019, San Francisco, CA.

Defining open chromatin using ATAC-seq: Applications to pulmonary immune responses. (invited speaker). A researcher's guide to integrating the pulmonary 'omicsverse. American Thoracic Society (ATS) Annual Meeting. May, 2019, Dallas, TX.

A novel dendritic cell type in the lung drives Th17 responses to inhaled allergens. (invited speaker) Southeastern Immunology Conference, June, 2019, Emory University, Atlanta, GA.

Allergic sensitization through the airway reveals functional diversity in lung DC2s. American Thoracic Society 2022 International Conference, San Francisco, CA.
