Your myositis is the result of the combined effects of many disease processes. One of these is disease activity, which is active inflammation in your/your child's muscles, skin, joints, intestines, heart, lungs or other parts of your body, which can improve when treated with medicines.

1. Considering all the ways that myositis affects you/your child, please rate the overall activity of your/your child's disease today by placing a mark on the line below.

No evidence of
disease activity

Extremely active or severe
disease activity

2. The Patient/Parent Global Disease Activity Assessment is also completed using a 21-point numeric rating scale that ranges from 0-10 and is in 0.5 increments, which measures a patient's overall evaluation of their disease activity. "0" indicates no evidence of disease activity and "10" indicates maximal disease activity.

Considering all the ways that myositis affects you/your child AT THE TIME, please rate the overall level of disease activity by filling a circle below.
