Instrument: Physician Global Damage Assessment (physician_global_damage_assessment)				
	1	[study_id]	Study ID	text
	2	[pgd_imacs_number]	Subject's IMACS number	text, Required Custom alignment: RH
	3	[pgd_date_of_assess]	Date of assessment (mm/dd/yyyy)	text (date_mdy), Required Custom alignment: RH Field Annotation: @PREVENT-FUTUREDATE
	4	[pgd_assess_num]	Assessment number	text, Required Custom alignment: RH
	5	[pgd_phys_assessor]	Assessor	text, Required Custom alignment: RH
	6	[pgd_global_instruction]	Physician Global Damage Assessment Damage is defined as persistent changes in anatomy, pathology, physiology, or function, such as fibrosis, scarring, or atrophy, resulting from any cause (including prior treatment) since the onset of myositis. Features of damage are ascertained by clinical assessment and must be present for at least 6 months (or the pathology that led to the feature must have been present for at least 6 months) despite immunosuppressive or other therapy, including exercise and rehabilitation. The global assessment of disease damage is to be judged from all the information available to you today including the patient's appearance, history,	descriptive

			physical examination, diagnostic laboratory testing and your resultant medical therapy. 1. Please rate your global (overall) assessment of the current myositis damage by drawing a vertical mark on the 10-cm. line according to the following scale: left end of line = no evidence of disease damage, midpoint of line = moderate disease damage, and right end of line = extreme or maximum disease damage. No evidence of disease damage {pgd_global_dam_vas} Extremely severe disease damage <i>mm</i>	
	7	[pgd_global_dam_vas]	1. Please rate your global (overall) assessment of the current myositis damage by dragging the slider line according to the following scale: left end of line = no evidence of disease damage, midpoint of line = moderate disease damage, and right end of line = extreme or maximum disease damage.	slider (Min: 0, Max: 100), Required Custom alignment: LH
	8	[pgd_global_dam_vas_length]	Length of the visual analog scale for the Physician Global Damage Assessment. <i>mm</i>	text (integer, Min: 0), Required Custom alignment: RH Field Annotation: @DEFAULT = "100"
	9	[pgd_global_dam_adj_vas]	PHYSICIAN GLOBAL DAMAGE ASSESSMENT (0-10 cm VAS)	calc Calculation: round((((pgd_global_dam_vas] * 10) / [pgd_global_dam_vas_length]),1) Custom alignment: RH
	10	[pgd_21_pt_num_rating_scale_tbl]	2. The Physician Global Damage Assessment may also be completed with a 21-point numeric rating scale that ranges from 0-10 and is in 0.5 increments, which measures a physician's overall evaluation of patient's disease damage. "0" indicates no evidence of disease damage and "10" indicates maximal disease damage. Considering all the signs and symptoms of the disease AT THE TIME OF THE PRESENT VISIT, please rate the overall level of damage by filling a circle below. No evidence of disease damage {pgd_21_pt_num_rating_scale} Extremely severe disease damage	descriptive
	11	[pgd_21_pt_num_rating_scale]	Considering all the signs and symptoms of the disease AT THE TIME OF THE PRESENT VISIT, please rate the overall level of disease damage by filling a circle below.	radio (Matrix - ranking) 0 0
